I am Mac Jones Soriano, a Frontend Web Developer. I see the future of technology is constantly changing. That's why, when I finished my first year in College, I choose to became a dropout student. I switch from a degree of Mechanical Engineering and turn into my career path as a web developer.

I found that my skills are for programming especially in Web Development. In my two years of studying code, I think I'm ready to show this to the world. I'm always motivated and looking for new challenges. And now, I'm willing to serve others and to provide my valuable skills like building website applications, solving problems, finding best solution and more efficient code.

Experience With

- HTML
- CSS
- JavaScript
- Sass
- Git and GitHub

- React.js
